

CRIMINAL JUSTICE CONFERENCE

BY JUSTICERAIN, INC

The United States has less than 5 percent of the world's population. But it has almost a quarter of the world's prisoners. The United States leads the world in producing prisoners... Americans are locked up for crimes – from writing bad checks to using drugs – that would rarely produce prison sentences in other countries. Americans are kept incarcerated far longer than prisoners in other nations. The United States has 2.3 million criminals behind bars, more than any other nation, according to data maintained by the International Center for Prison Studies at King's College London.
